# Hugo Carvalho

Game Developer at Bald Studios

Lisboa

## Resumo

Student of Video Game Development at Universidade Lusófona De Humanidades e Tecnologias. Currently developing my skills in Unity and C# programming and also Python, HTML, and CSS.

For my graduation final project, I'm developing a project called Alter, a first-person puzzle game where you play as Layla, a girl with a polymorphic body.

I am interested in developing entertainment games, improving my skills, and better understanding the mechanisms behind the creation of video games.
